

## BioThreat Alert® ELISA Kits

ELISA Kits are now available to detect a variety of agents:

- Anthrax (*B. anthracis* vegetative or spore; VERY specific)
- *B. globigii*
- Botulinum Toxin A, B, C, E, and F
- Brucella
- Burkholderia
- Vibrio cholerae 01
- Vibrio cholerae 0139
- Plague (*Y. pestis*)
- Ricin
- SEB (Staphylococcal Enterotoxin B)
- SEA (Staphylococcal Enterotoxin A)
- Tularemia (*F. tularensis*)
- Abrin
- MS2

### Advantages:

- Better sensitivity than BioThreat Alert® strips
- ELISA format is friendly to samples from complex matrices:
  - Food
  - Surface swipes
  - Unknown powders
  - Air collected samples
  - Air filters
- Optional “Positive/Negative” capture format reduces matrix effects
- Kits are available either pre-coated with capture antibody or non-coated to allow for user flexibility
- Kits are available in breakaway format

*Used by USDA and FDA Laboratories*

Indicative price range: \$1 650,00 – \$1 850,00
